Summary

Data Science and Analytics Professional with 4 years of experience in Marketing and Supply Chain Analytics, specializing in ML modeling and building scalable workflows. Skilled in data analysis, visualization, and storytelling, with a track record of delivering end-to-end analytical solutions aligned to business goals.

Professional Experience

Data Scientist - Paycom | Dallas, TX Jun 2025 -Current

- Implemented agentic AI workflows using LLMs to automate internal data querying and marketing performance reporting, reducing manual reporting by ~20 hours/week.
- Created AI agents to analyze customer data and identify cross-selling opportunities and engagement patterns, contributing to a 4% lift in campaign targeting accuracy.
- Developed and deployed a churn prediction model to identify at-risk accounts and partnered with MD and VP-level leadership to translate findings into proactive retention strategies.
- Built a customer lifetime value model on B2B client data to rank accounts by long-term revenue potential, helping sales and marketing teams prioritize upsell opportunities, projected to drive a 10% increase in account expansion revenue in Q2.
- Designed a customer segmentation model using clustering on behavioral and transactional data, enabling marketing to personalize outreach and optimize spend, improving campaign response rates by 6%.

Data Scientist Co-op - Paycom | Oklahoma City, OK May 2024-Apr 2025

- Engineered a Customer 360 framework by consolidating CRM, billing, support, and product usage data, creating features for downstream ML models including churn prediction, CLV scoring, and customer segmentation.
- Developed a classification model to predict customer support ticket escalations, enabling the support team to route high-priority cases faster and reduce resolution time by 18%.
- Designed an LLM-powered workflow to leverage customer segment and engagement history for personalized marketing content, improving email open rates by 6.5%.
- Automated data quality checks and validation pipelines across customer datasets, reducing data-related errors by 35% and improving reliability for downstream analytics and modeling workflows.

Data Science Engineer - Brillio | India Sep 2021-Jul 2023

- Played a key role to develop a modern Data layer from scratch, saving the client $2.6M and enabling data science teams to access clean, real-time data for modeling and analysis.
- Conducted funnel and cohort analysis on customer acquisition data, identifying drop-off points that led to process changes improving lead-to-conversion rate by 12%.
- Built automated dashboards tracking campaign performance and customer engagement KPIs, reducing reporting turnaround from weeks to days for business stakeholders.
- Performed A/B test analysis on marketing campaigns to evaluate messaging and channel effectiveness, providing recommendations that improved customer response rates by 8%.

Business Analyst - iCompaas | India Apr 2021-Aug 2021

- Oversaw offshore analytics and reporting for product metrics, improving usage tracking by 3%; reported directly to the founding team and led analysis requirements for data science/engineering initiatives.

Technical Skills

Languages/Platforms: Python, R, SQL, Bash, Tableau, Power BI, MS Excel, Docker, AWS, GCP
AI: LLMs, AI Agents & Workflows, NLP, RAG, Generative AI
Databases: MySQL, SQL Server, Snowflake, MongoDB, Neo4j, Redis
Libraries: Pandas, NumPy, Matplotlib, PySpark, PyTorch, Scikit-learn
ML Skills: Classification, Regression, Clustering, Causal Modeling, Hypothesis Testing, A/B Testing, Exploratory Data Analysis, Segmentation

Education

- MS in Business Analytics & Data Science | Oklahoma State University, USA | GPA: 3.9/4 May 2025
- Bachelor's in Computer Science Engineering | Dr. MGR University, India | GPA: 8.8/10 May 2021
